

Screening the world.

RiteScreen's uniquely designed window screen programs allow you to increase your production and your profits. Our Screens Installed Program is ideal for manufacturers who install the screens in the windows during production and our Screens Separate Program is ideal for manufacturers who ship their screens separate from the window units. Both programs eliminate the extra costs involved with stocking, packaging, or sequencing the screens in-house.

# ScreensInstalled Program

Simply send in your order via RiteScreen's EDI system, secure FTP site, or E-mail and we will process it the same day. We manufacture each screen according to your exact specifications and apply a discreet label that easily identifies the screen. We then sort the screens in the same sequence as the windows flowing down your production line and package them inside portable Gaylord boxes. When the screens arrive at your plant, they are ready to be installed in your windows.

PO#	PO Line#	Req Date	QTY	Series	Desc	Color	Screen Width	Screen Height	XB Loc	LOT	BIN
914603	1	1/1/2012	2	2000	HR	WHT	19 1/2	21 7/8		6601	1

# ScreensSeparate Program

Simply send in your order via RiteScreen's EDI system, secure FTP site, or E-mail and we will process it the same day. We offer various types of packaging to work within your budget, including stretch wrap, bags, and cardboard. Whether you require screens packed by job lots or truck routes, we turn your screens into pre-packaged orders, labeled, bar-coded, and ready to be loaded on your trailers for delivery to your customers.
